CEREMONY

*PREIS-  
VERLEIHUNG*

**MüllerKälber GmbH** convinced the jury to award them the 2000.-€ prize for a stand at inhorgenta 2012.

The newly developed “Dimension Vitrine” uses LED technology to stage jewellery ideally in the showcase. Easily the colour temperature can be adjusted to the jewellery`s alloy colour from warm shades into cold light. The intelligent use of glass characteristics i.e. to reflect light offers the chance to present the work in a 360` radius of light.
